10. (currently amended) An article of manufacture useful in treating a neurological condition characterized by overactivation of an ionotropic glutamatergic receptor, said article containing a pharmaceutical composition consisting essentially of at least one aromatic amino acid, isomer, or analog thereof, The article of manufacture, according to claim 1, wherein said at least one aromatic amino acid, isomer or analog thereof is an enantiomer selected from the group consisting of D-tyrosine, D-tryptophan, and or D-phenylalanine.
11. (currently amended) An article of manufacture useful in treating a neurological condition characterized by overactivation of an ionotropic glutamatergic receptor, said article containing a pharmaceutical composition consisting essentially of at least one aromatic amino acid, isomer, or analog thereof, The article of manufacture, according to claim 1, wherein said at least one aromatic acid, isomer or analog thereof is an admixture of D-tyrosine and D-tryptophan; D-tyrosine and D-phenylalanine; D-tryptophan and D-phenylalanine; and or D-tyrosine, D-tryptophan, and D-phenylalanine.
12. (Cancelled)
13. (currently amended) An article of manufacture useful in treating a neurological condition characterized by overactivation of an ionotropic glutamatergic receptor, said

article containing a pharmaceutical composition consisting essentially of at least one aromatic amino acid, isomer, or analog thereof. The article of manufacture, according to claim 1,, wherein said at least one aromatic acid, isomer or analog thereof is an admixture of L-phenylalanine and D-phenylalanine.
